

## Technical Specifications

<b>Power Consumption</b>	-- kW
<b>Water Consumption</b>	5 liters/min
<b>Water Pressure bar</b>	3 bar
<b>Net Weight</b>	130 kg
<b>Number of operators</b>	0

- High speed
- Stainless steel and FDA materials
- Simplified maintenance procedure
- In-line connection with VMK11
- Multiple end product options
- Low water consumption

## Features for the VMK42

The VMK42 is fitted direct to and driven mechanically by the VMK11 Filleting machine. The infeed of the VMK42 deep skinning machine works as a fillet conveyor for production of skin-on fillets. Change over from skinned to skin-on fillets is fast and easy. Outfeed of the skinnless fillets and the waste can be done on left or right side of the machine.

The skinning roller is selected due to the species. The skinning depth can easily be adjusted by means of set screws.

Skins most species, e.g. Blue Whiting, Saithe, Pollock, Pacific Saury, etc.

An optional unit, M9, must be added to the VMK11, adding an extra set of cutting blades for production of singel fillets.

### Electrical connection

The VMK42 is driven by the VMK11. No electrical connection is necessary.

### Maintenance

The machine is easily accessed from all sides. Lubrication and service points easily accessed.
